Property Description

Land with 71,880m2 with the possibility of building a house or developing a Tourist Project. Taking advantage of this place to plant a vineyard or orchard is a possibility to take into account as the mild temperature and fertile soil characteristic of the West zone have given rise to a demarcated fruit and wine heritage in the region, known nationally and internationally. A special project for a contemporary house is already under development, according to the 3D illustrations, with the copyright belonging to the award-winning office of Architect Mário Martins. With wide views over the countryside and the village of Bombarral. A few minutes from the Bacalhôa Buddha Eden Oriental Garden. Several beaches on the Silver Coast 20 minutes away and Lisbon 45 minutes away. #ref:BL1092
