Property Description

Alvalade, one of Lisbon's trendiest neighbourhoods is the location of COPA Cool Living, a nine-storey building divided into 49 units of 1 to 3-bedroom apartments.

All the apartments have a special relationship with the exterior, creating a feeling of space without walls, the daily living experience offered by a close-knit neighbourhood.

Most of the apartments have access to a balcony, and those on the last floor benefit from private outdoor terraces with swimming pool and dining area. COPA Cool Living offers the most diverse amenities to its residents, from an electric bike park, parking and storage room to a gym and, of course, a shared outdoor garden.

This is a new construction project, imbued with symbiosis between sustainability and comfort, ideal for those seeking a fuller life in the city centre.

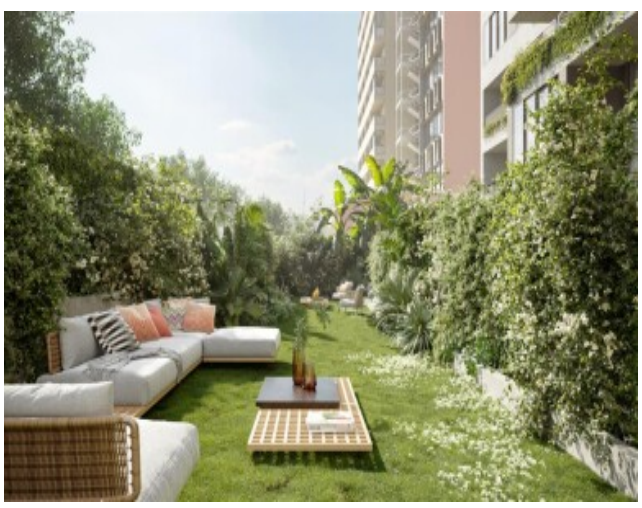

Located on one of the main avenues of the Alvalade neighbourhood, COPA Cool Living is just around the corner from the University Campus, Campo Grande garden, Alvalade Stadium and several iconic sites of the city of Lisbon.

So, it is served by an accessible transport network, from the Metro and Carris buses to the modern electric bikes that will take you all over the city.

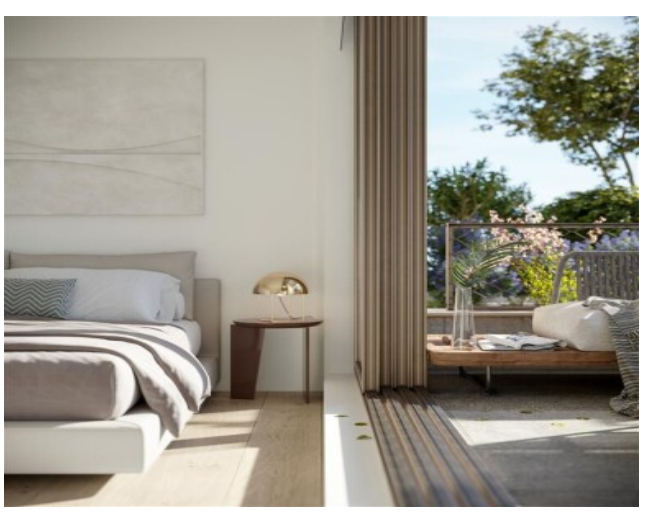

Only five minutes driving distance from Lisbon Airport.

This project is for everyone seeking the experience of living in the heart of Lisbon and use of the city parks as their own garden.
