Property Description

Dolmens Atrium phase II & III

Phase III of Antas Atrium continues the largest residential project under development in the city of Porto, an emblematic development that is transforming Alameda das Antas into a new modern, functional and family-oriented urban centre.

This new phase reinforces the ambition of the project through a selection of apartments of typologies T1 to T3, all designed with special attention to the relationship with the outdoors and daily comfort.

The units always have at least one parking space and all include storage, ensuring organisation and ease in everyday life. The plants privilege natural light, the efficiency of the areas and a functional use adapted to contemporary requirements, complemented by high standard finishes and technical solutions that ensure thermal and acoustic comfort.

Phase III integrates a complete set of amenities designed to promote well-being, coexistence and balance between personal and professional life. Residents will have access to a heated indoor pool, equipped gym with outdoor connection, children's room, social rooms and a vast outdoor area with lawned gardens, outdoor fitness areas, children's playground, picnic tables and petanque track.

The development also includes charging points for electric vehicles and a bicycle park, ensuring mobility solutions suitable for today's urban life.

The building follows strict construction standards, with a ventilated façade in sintered stone and frames with thermal cut, ensuring durability, energy efficiency and superior performance in terms of comfort.

Located in Alameda das Antas, at a strategic point in Porto, Antas Atrium benefits from a consolidated and highly functional environment. Within walking distance are the Alameda Shopping Center, the Dragão Stadium, Velasquez Square, the Citizen's Shop and the future Campanhã Slaughterhouse, as well as schools, local shops, essential services and leisure spaces.

Mobility is one of the great assets of this location: the Estádio do Dragão Metro station offers direct connection to all lines of the network, ensuring quick access to the centre, the airport and the entire Metropolitan Area. In addition, the immediate proximity to the Via de Cintura Interna ensures easy connection to the main roads in the region.

With work scheduled to start in the 1st quarter of 2026 and estimated completion by the end of 2028, Phase III of Antas Atrium represents an exceptional opportunity to live or invest in one of the most structuring and relevant projects in the city.

More than a residential development, this phase adds a new chapter to an urban concept that combines contemporary architecture, sustainability, well-being and an integrated experience in one of the most dynamic and promising places in Porto.

In phase II of the Antas Atrium Development – there are still some fractions available, T0 to T3 Duplex, the work of phase II began in the 1st quarter of 2025 and is scheduled to be completed by the end of 2026.
