Property Description

T2 in Douro Atlântico development with sea and river views

2 bedrooms, 2 bathrooms, one of which is a suite, has laundry and a 13.25m² balcony
Excellent solar orientation of SW/NW/NE.

Integrated into the Douro Atlântico III development; Still under construction, delivery is expected in October 2025.

It is a project that stands out for its modern architecture and excellent location, placing the River and the Sea in a single landscape. Distinguished by attention to every detail, the interior of the apartments benefits from natural light, excellent acoustic and thermal insulation and large spaces that extend into spacious and refined balconies. The Douro Atlântico III apartments have everything you need for a quality experience, as you always dreamed of.

With excellent construction quality and a superior level of finishes, paying attention to details that provide a comfortable, sophisticated and modern environment.

The views of the river and the sea give all apartments the tranquility, well-being and privacy so desired. Facing the source of the Douro River and the Atlantic Ocean, Douro Atlântico is located in one of the most emblematic places in Porto: the Vila Nova de Gaia waterfront, next to the Douro Estuary Local Nature Reserve.

The excellent location of this development puts services and access even closer. Discover some of the perks of living in the largest city in the North of Portugal: Cais de Gaia, several bars, Arrábida and Gaia Shopping, Port Wine Cellars, WOW, Antiga Seca do Bacalhau, Parque de S. Paio and Parque de Lavadores.

GENERAL ASPECTS

STRUCTURE made of reinforced concrete with direct foundations, reticulated structure of pillars and beams, with solid slabs, calculated according to regulatory standards in force, including the safety in wind and earthquakes.

EXTERIOR WALLS made of masonry thermal and acoustic ceramic brick, with air gap and thermal/acoustic insulation. The interior walls They will also be made of ceramic brick.

FLOORS with lightweight concrete fillers for involvement of all technical networks (service networks) water, sewage, electricity, telephones, gas and air conditioning). Application of polyethylene screen for acoustic insulation and leveling screed for final finish support.
