Property Description

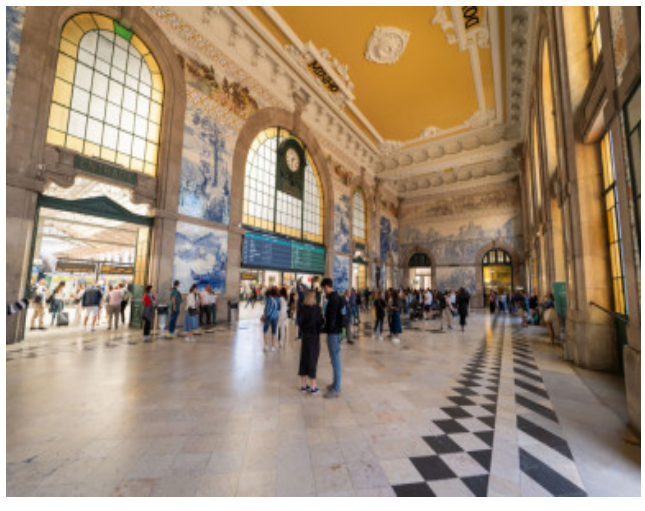

COSTA CABRAL FLATS is a residential building on Rua Costa Cabral, in Porto, consisting of 50 fractions, studios and T1 and T2 apartments, with a markedly contemporary architecture, with a layout aimed at a young audience, which favours functionality and design.

It is located in a consolidated residential area in great transformation, with local shops, supermarkets and restaurants, in the surroundings of the university campus and Hospital de S. João, a few minutes from the ring road, internal belt road and access to the A3.

The building designed by the architects Pedro Cardoso and Nuno Campos is spread over 6 floors - 4 residential and 2 parking/storage with a private garden at the back.

All apartments have balconies and terraces, combining design, comfort and functionality, and are intended for those who want to live next to the university campus, in an area with excellent access and transport to downtown Porto.
